cyber security is taking on an important role in information systems and data transmission over public networks this is due to the widespread use of the internet for business and social purposes this increase in use encourages data capturing for malicious purposes to counteract this many solutions have been proposed and introduced during the past 80 years but cryptography is the most effective tool some other tools incorporate complicated and long arithmetic calculations vast resources consumption and long execution time resulting in it becoming less effective in handling high data volumes large bandwidth and fast transmission adding to it the availability of quantum computing cryptography seems to lose its importance to restate the effectiveness of cryptography researchers have proposed improvements this book discusses and examines several such improvements and solutions

today s social media networks play a role in many sectors of human life including health science education and social interaction the use of social media has greatly impacted humans bringing substantial changes in individual communication through the use of social media networks individuals share a large amount of personal information making the privacy and security of individuals a significant challenge social media platforms face social media platforms work to address the challenges of protecting user data such as banking details and personally identifiable information further research into sufficient resources and social media architecture may ensure safe secure media usage across various platforms and applications analyzing privacy and security difficulties in social media new challenges and solutions analyzes the numerous privacy and security challenges social media networks face as well as the privacy dangers these networks present it explores effective solutions to address the challenges of social media information privacy this book covers topics such as cybersecurity surveillance technology and data science and is a useful resource for computer engineers media professionals security and privacy technicians business owners academicians scientists and researchers
